

EO Ring with ellipsoidal cross-section can be arranged for any length & size you want !!!

EO Ring Code

EO Ring Kit

“EO Ring Code” has been developed as the ideal sealing material, based on our research through a leak testing. Cross section of “EO Ring Code” is ellipsoidal, which allows more margins to squeeze than O-ring. Due to that extra margin, a spacer can be installed between WORK and surface of jig in order to prevent a heat exchange. Also, its great effectiveness remains even when a spacer not used.

“EO Ring Code” is string-shape and 3-meter long, can be arranged in any length required and just glue to use.

“EO Ring Kit” is user-friendly and handy tool as everything required is just ready for you!!!

Feature 1 Enhanced Seal Ability

- Ellipsoidal shape allows more margins to squeeze. Enhances seal ability
- Hardly come off from groove and can be used in relatively small seal area.

Feature 2 Less Heat Exchange

- Spacer (stopper) can be arranged between WORK and jig.
- Spacer allows heat insulation between WORK and jig. That leads less heat exchange and stable measurement.

Feature 3 Cost-Friendly Kit

- As “EO Ring Code” can be arranged in a complex shape, mold or specialized packing no longer necessary. Even when creating O-ring in a mold, EO Ring is ideal tool for trial.
- “EO Ring Kit” allows flexible shape of O-ring with reasonable price

EO Ring Code Specification

Cross Section Size	W 2.6 × H 3.5(mm)
Material	NBR
Hardness	JIS A 60°
Color	Black
Length	3.0m
Dimension Tolerance	JIS 2401B Equivalent ±0.15mm

Components of EO Ring Kit (EK-10)

Cutting Jig	1 piece
Glue jig	1 set
Glue	1 piece
Cutter	1 piece
EO Ring Code	2 pieces
